Weekly Research Digest

1. **A rapid evaluation of the preparedness of Ethiopia's disease surveillance system for Mpox outbreak: a cross-sectional study of perspectives from professionals across various levels**
   Summary: This cross-sectional study identifies key preparedness gaps—such as the need for enhanced training, infrastructure, and coordination—among disease surveillance professionals in Ethiopia.
   URL: https://pubmed.ncbi.nlm.nih.gov/42251460/?utm_source=Other&utm_medium=rss&utm_campaign=pubmed-2&utm_content=1pq-4TZ0w1pPimDnGGLd0YYkNazUbHLUabSSCCiJNXYlhwM9d5&fc=20260607141638&ff=20260607142804&v=2.20.0
2. **Electric bicycles-related orthopedic injury spectrum: retrospective analysis of 1,735 cases (2020-2025)**
   Summary: A retrospective analysis of over 1,700 cases shows that electric bicycle injuries predominantly affect middle-aged and elderly populations and most commonly result in fractures.
   URL: https://pubmed.ncbi.nlm.nih.gov/42251405/?utm_source=Other&utm_medium=rss&utm_campaign=pubmed-2&utm_content=1pq-4TZ0w1pPimDnGGLd0YYkNazUbHLUabSSCCiJNXYlhwM9d5&fc=20260607141638&ff=20260607142804&v=2.20.0
3. **Regional variability in the associations between social and health-related risk factors and memory across Europe**
   Summary: This study examines how social and health risk factors like living alone and obesity associate with memory decline differently across distinct geographic and economic regions in Europe.
   URL: https://pubmed.ncbi.nlm.nih.gov/42251110/?utm_source=Other&utm_medium=rss&utm_campaign=pubmed-2&utm_content=1pq-4TZ0w1pPimDnGGLd0YYkNazUbHLUabSSCCiJNXYlhwM9d5&fc=20260607141638&ff=20260607142804&v=2.20.0
4. **Educating nurses for a climate-impacted world: A systematic review of curricular and professional training approaches**
   Summary: A systematic review highlights the urgent need for structured nursing curriculum reforms and technology-enhanced training frameworks to prepare clinical staff for the health impacts of climate change.
   URL: https://pubmed.ncbi.nlm.nih.gov/42250926/?utm_source=Other&utm_medium=rss&utm_campaign=pubmed-2&utm_content=1pq-4TZ0w1pPimDnGGLd0YYkNazUbHLUabSSCCiJNXYlhwM9d5&fc=20260607141638&ff=20260607142804&v=2.20.0
5. **Multidomain expert evaluation of leading large language models as providers of vaccination and preventive medicine information**
   Summary: An expert evaluation of leading large language models reveals uneven quality in vaccine information delivery, emphasizing the necessity of domain-specific fine-tuning and language-sensitive optimization in public health.
   URL: https://pubmed.ncbi.nlm.nih.gov/42250396/?utm_source=Other&utm_medium=rss&utm_campaign=pubmed-2&utm_content=1pq-4TZ0w1pPimDnGGLd0YYkNazUbHLUabSSCCiJNXYlhwM9d5&fc=20260607141638&ff=20260607142804&v=2.20.0
6. **A body roundness index (BRI)-based predictive model for metabolic syndrome in perimenopausal and postmenopausal women-from a cross-sectional machine learning study to a longitudinal dynamic assessment**
   Summary: Researchers developed an artificial neural network predictive model utilizing the Body Roundness Index to screen for and dynamically track long-term metabolic syndrome risk in perimenopausal and postmenopausal women.
   URL: https://pubmed.ncbi.nlm.nih.gov/42250232/?utm_source=Other&utm_medium=rss&utm_campaign=pubmed-2&utm_content=1pq-4TZ0w1pPimDnGGLd0YYkNazUbHLUabSSCCiJNXYlhwM9d5&fc=20260607141638&ff=20260607142804&v=2.20.0
7. **History repeats in sweet solutions: toxicological concerns and targeted recommendations following the cough syrup-linked paediatric mortalities in India**
   Summary: This paper reviews recent pediatric deaths from contaminated cough syrups to outline critical concerns regarding global pharmaceutical regulation and drug safety in low- and middle-income regions.
   URL: https://pubmed.ncbi.nlm.nih.gov/42250231/?utm_source=Other&utm_medium=rss&utm_campaign=pubmed-2&utm_content=1pq-4TZ0w1pPimDnGGLd0YYkNazUbHLUabSSCCiJNXYlhwM9d5&fc=20260607141638&ff=20260607142804&v=2.20.0
8. **Research on influenza surveillance and a prediction model based on multi-source data**
   Summary: This study develops an early-warning forecasting index for influenza using a simplified LSTM neural network model trained on multi-source surveillance data.

URL: https://pubmed.ncbi.nlm.nih.gov/42249461/?utm_source=Other&utm_medium=rss&utm_campaign=pubmed-2&utm_content=1pq-4TZ0w1pPimDnGGLd0YYkNazUbHLUabSSCCiJNXYlhwM9d5&fc=20260607141638&ff=20260607142804&v=2.20.0

9. **Hybrid CNN-GNN architectures with distributed training for heathland plant classification**
   Summary: This paper introduces a hybrid deep learning model combining CNNs and GNNs with distributed training to capture complex spatial and visual features for ecological monitoring.
   URL: https://pubmed.ncbi.nlm.nih.gov/42249215/?utm_source=Other&utm_medium=rss&utm_campaign=pubmed-2&utm_content=1pq-4TZ0w1pPimDnGGLd0YYkNazUbHLUabSSCCiJNXYlhwM9d5&fc=20260607141638&ff=20260607142804&v=2.20.0
10. **The relationship between mobile health app use, eHealth literacy, and psychological well-being in women with gynecological cancer: a descriptive correlational study**
   Summary: A descriptive study shows that higher eHealth literacy and the use of mobile health applications are positively associated with enhanced psychological well-being in gynecological cancer care.
   URL: https://pubmed.ncbi.nlm.nih.gov/42249208/?utm_source=Other&utm_medium=rss&utm_campaign=pubmed-2&utm_content=1pq-4TZ0w1pPimDnGGLd0YYkNazUbHLUabSSCCiJNXYlhwM9d5&fc=20260607141638&ff=20260607142804&v=2.20.0

Relevance to My Work

As a Business Intelligence Analyst & Data Scientist with the WHO Africa Region, several of these publications directly intersect with your efforts in engineering public health architectures, advanced epidemiology analytics, and responsible AI across Africa:

- **Informing Public Health RAG Chatbots & Responsible AI Deployment:**
  The expert evaluation of leading large language models (LLMs) in delivering vaccination and preventive medicine information (**Publication 5**) is highly relevant to your work building retrieval-augmented generation (RAG) chatbots and NLP media-monitoring pipelines. Because the paper highlights the uneven performance of LLMs in delivering highly critical healthcare guidance, it underscores the need for your engineering efforts to prioritize domain-specific fine-tuning (e.g., via spaCy, ALBERT, and curated public health datasets) and strict grounding of RAG pipelines over trusted WHO-approved unstructured and relational data to avoid hallucinations.
- **Strengthening National and Regional Outbreak Intelligence Systems:**
  The evaluation of Ethiopia's Mpox outbreak preparedness gaps (**Publication 1**) and the development of the multi-source LSTM influenza prediction model (**Publication 8**) align directly with your background in epidemiology and your work developing regional outbreak-intelligence systems. Ethiopia is one of the 47 countries integrated into your Microsoft Fabric public-health data lakehouse. These papers showcase how multi-source data models and structured gap assessments can be incorporated directly into your Azure-based lakehouse pipelines to trigger automated epidemiological alerts and dynamically measure country-level preparedness indicators.
- **Engineering Multi-Source Surveillance for Adverse Drug Events:**
  The toxicological review of contaminated pediatric cough syrup mortalities in low- and middle-income nations (**Publication 7**) highlights the critical necessity of regional pharmaceutical safety surveillance. Leveraging your Microsoft Fabric data lakehouse to ingest and clean heterogeneous regulatory, customs, and toxicology surveillance data from 47 African countries could provide the foundational framework needed to identify similar cross-border contamination threats rapidly and support automated public health alerts.
